THE VIRGINIA REGISTER is an official state publication issued every other week throughout the year. Indexes are published quarterly and the last index of the year is cumulative. THE VIRGINIA REGISTER has several functions. The new and amended sections of regulations, both as proposed and as finally adopted, are required by law to be published in THE VIRGINIA REGISTER OF REGULATIONS. In addition, THE VIRGINIA REGISTER is a source of other information about state government, including all emergency regulations and executive orders issued by the Governor, the Virginia Tax Bulletin issued periodically by the Department of Taxation, and notices of public hearings and open meetings of state agencies.

ADOPTION, AMENDMENT, AND REPEAL OF REGULATIONS

An agency wishing to adopt, amend, or repeal regulations must first publish in the Virginia Register a notice of intended regulatory action; a basis, purpose, substance and issues statement; an economic impact analysis prepared by the Department of Planning and Budget; the agency’s response to the economic impact analysis; a summary; a notice giving the public an opportunity to comment on the proposal; and the text of the proposed regulation.

Following publication of the proposal in the Virginia Register, the promulgating agency receives public comments for a minimum of 60 days. The Governor reviews the proposed regulation to determine if it is necessary to protect the public health, safety and welfare, and if it is clearly written and easily understandable. If the Governor chooses to comment on the proposed regulation, his comments must be transmitted to the agency and the Registrar no later than 15 days following the completion of the 60-day public comment period. The Governor’s comments, if any, will be published in the Virginia Register. Not less than 15 days following the completion of the 60-day public comment period, the agency may adopt the proposed regulation.

The appropriate standing committee of each branch of the General Assembly may meet during the promulgation or final adoption process and file an objection with the Registrar and the promulgating agency. The objection will be published in the Virginia Register. Within 21 days after receipt by the agency of a legislative objection, the agency shall file a response with the Registrar, the objecting legislative committee, and the Governor.

When final action is taken, the agency again publishes the text of the regulation as adopted, highlighting all changes made to the proposed regulation and explaining any substantial changes made since publication of the proposal. A 30-day final adoption period begins upon final publication in the Virginia Register.

The Governor may review the final regulation during this time and, if he objects, forward his objection to the Registrar and the agency. In addition to or in lieu of filing a formal objection, the Governor may suspend the effective date of a portion or all of a regulation until the end of the next regular General Assembly session by issuing a directive signed by a majority of the members of the appropriate standing committees and the Governor. The Governor’s objection or suspension of the regulation, or both, will be published in the Virginia Register. If the Governor finds that changes made to the proposed regulation have substantial impact, he may require the agency to provide an additional 30-day public comment period on the changes. Notice of the additional public comment period required by the Governor will be published in the Virginia Register.

The agency shall suspend the regulatory process for 30 days when it receives requests from 25 or more individuals to solicit additional public comment, unless the agency determines that the changes have minor or inconsequential impact.

A regulation becomes effective at the conclusion of the 30-day final adoption period, or at any other later date specified by the promulgating agency, unless (i) a legislative objection has been filed, in which event the last index of the year is cumulative. THE VIRGINIA REGISTER OF REGULATIONS. In addition, THE VIRGINIA REGISTER is a source of other information about state government, including all emergency regulations and executive orders issued by the Governor, the Virginia Tax Bulletin issued periodically by the Department of Taxation, and notices of public hearings and open meetings of state agencies.

EMERGENCY REGULATIONS

If an agency demonstrates that (i) there is an immediate threat to the public’s health or safety; or (ii) Virginia statutory law, the appropriation act, federal law, or federal regulation requires a regulation to take effect no later than (a) 280 days from the enactment in the case of Virginia or federal law or the appropriation act, or (b) 280 days from the effective date of a federal regulation, it then requests the Governor’s approval to adopt an emergency regulation. The emergency regulation becomes operative upon its adoption and filing with the Registrar of Regulations, unless a later date is specified. Emergency regulations are limited to addressing specifically defined situations and may not exceed 12 months in duration. Emergency regulations are published as soon as possible in the Register.

During the time the emergency status is in effect, the agency may proceed with the adoption of permanent regulations through the usual procedures. To begin promulgating the replacement regulation, the agency must (i) file the Notice of Intended Regulatory Action with the Registrar within 60 days of the effective date of the emergency regulation; and (ii) file the proposed regulation with the Registrar within 180 days of the effective date of the emergency regulation. If the agency chooses not to adopt the regulations, the emergency status ends when the prescribed time limit expires.

STATEMENT

The foregoing constitutes a generalized statement of the procedures to be followed. For specific statutory language, it is suggested that Article 2 (§ 9-6.14:7.1 et seq.) of Chapter 1.1:1 of the Code of Virginia be examined carefully.

TITLE 9. ENVIRONMENT

STATE AIR POLLUTION CONTROL BOARD

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the State Air Pollution Control Board intends to consider promulgating regulations entitled: 9 VAC 5-210-10 et seq. Regulation for Dispute Resolution. The purpose of the proposed action is to establish requirements to govern the use of mediation and dispute resolution in regulation development and permit issuance. Section 10.1-1186.3 A of the Code of Virginia allows the State Air Pollution Control Board to use mediation and alternative dispute resolution to resolve underlying issues, to reach a consensus, or to compromise on contested issues related to the development of a regulation or to the issuance of a permit. Section 10.1-1186.3 D of the Code of Virginia specifies that the board shall adopt regulations in accordance with the Administrative Process Act for the implementation of § 10.1-1186.3. These regulations are to include (i) standards and procedures for the conduct of mediation and dispute resolution, (ii) the appointment and function of a neutral; and (iii) procedures to protect the confidentiality of papers, work product, or other materials.

Beginning in the early 1970s, federal, state, and local governments have increasingly used mediation and other consensus-building tools as an alternative to more traditional means of resolving disputes. These consensus-building tools are intended to supplement, not replace, conventional legislative, judicial, administrative, or regulatory mechanisms. The benefits of dispute resolution (DR) are many:

(1) DR achieves results satisfactory to all parties. Since each party learns to search for common ground and to recognize similar interests in the other parties, the traditional "hero vs. villain" illusion of adversarial disputes is avoided. Because the eventual solution is beneficial to all parties rather than only one, the process produces mutual satisfaction in all parties, rather than winners and losers. Studies by the American Arbitration Association show that 80% of participants were satisfied with their DR programs regardless of process or outcome.

(2) DR saves money. For instance, a single mediation undertaken by the New Jersey Center for Public Dispute Resolution to settle a dispute with the federal government over the state's emergency transport system avoided a potential loss of $20 million in federal funds.

(3) DR accelerates the decision-making process. Because the concerned parties have a vested interest in achieving a speedy settlement, resolutions are generally reached in much less time through DR than is required for resolutions to be reached through more traditional means.

(4) DR decreases the load on the court system. For instance, Cincinnati's Institute of Justice Private Complaint Program has reduced the municipal court's caseload by a third every year since 1974, with nearly half of the referred cases settled out of court and others being referred to noncourt agencies. Government decision-makers sometimes perceive litigation as a politically safer option than DR since the court can be blamed for any undesirable outcome. These decision-makers, however, have much more control over the outcome through DR than through litigation. Furthermore, they can still exercise their right to a court settlement if DR fails.

(5) DR is politically advantageous to the involved parties by enhancing their reputation for consensus-building and problem-solving. Because DR has developed only over the course of the past two decades, some local government officials and other small-group representatives are unaware of its existence or question its legitimacy as a problem-solving tool appropriate to the inherently conservative atmosphere of government. But DR is not the same as binding arbitration: its use is neither an admission of failure nor an abdication of authority, but a demonstration that the involved parties are sufficiently dedicated to the public good to be willing to compromise in order to reach a solution.

A large number of the issues settled through DR are environmental ones. Dispute resolution centers in New Jersey, Massachusetts, Minnesota, New York, New Mexico, Georgia, Florida, and many other states have initiated important discussions and facilitated agreements involving complex and controversial issues like the establishment of regional sewage treatment facilities, the siting of solid waste disposal facilities, the disposal of hazardous waste, the clean-up of a Superfund site, the spraying of herbicides, the adoption of environmental standards, and the siting of underground storage tanks. A well-known example of the successful use of mediation to address an environmental problem is the decade-long public battle over the development of Hawaii's first state water code, which pitted developers against environmentalists, large landowners against small ones, and the counties against the state. This battle produced one legislative stalemate after another to the frustration of all parties but was finally resolved through mediation conducted by Hawaii's Program on Alternative Dispute Resolution.

An example of what happens without DR is the case of the Hampton-Roads refinery in Virginia. The refinery was proposed in 1970, discussed for over a decade, but never built. Contributing to the failure of the project were badly timed changes in the permitting process, understaffing of the State Air Pollution Control Board, statutory vagueness, siting
disagreements, lack of communication within the Army Corps of engineers, angry citizens, gubernatorial dissatisfaction with the progress of the project, the involvement of the federal government through both the Department of the Interior and the military, and the expiration of the initially issued permits. At the end of the failed project, the company's expenses were over six million dollars, with about half of that in legal fees. The Army Corps of Engineers' bill for legal fees was at least that amount. This case is a good example of the many such environmental disputes which die of exhaustion rather than being settled fairly and thoughtfully. Millions of dollars and thousands of labor years were squandered without an equitable settlement.

One way for Virginia to avoid this situation in the future is to adopt regulations that enable it to implement § 10.1-1186.3 of the Code of Virginia.

The primary issues that need to be addressed in the development of the regulation are those specified in § 10.1-1186.3 (see "Legal Requirements" above). Secondary issues may involve procedural matters such as the division of costs, scheduling requirements, and so on.

Alternatives to the proposed regulation amendments are being considered by the department. The department has tentatively determined that the first alternative is appropriate, as it is the least burdensome and least intrusive alternative that fully meets the purpose of the regulatory action. The alternatives being considered by the department are discussed below.

1. Amend the regulations to satisfy the provisions of the law. This option is being selected because it meets the stated purpose of the regulatory action: to comply with the mandate of § 10.1-1186.3 of the Code of Virginia that requires the adoption of regulations for the use of mediation or alternative dispute resolution in the development of a regulation or in the issuance of a permit.

2. Make alternative regulatory changes to those required by the provisions of the law and associated regulations and policies. This option is not being selected because it does not meet the stated purpose of the regulatory action.

3. Take no action to amend the regulations. This option is not being selected because it does not meet the stated purpose of the regulatory action.

As provided in the public participation procedures of the State Air Pollution Control Board, the department will include, in the subsequent Notice of Intended Regulatory Action, a description of the above alternatives and a request for comments on other alternatives and the costs and benefits of the above alternatives or the other alternatives that the commenters may provide.

In the formulation of this regulation, the department will consider the impact of the regulation on family formation, stability, and autonomy. It is not anticipated that this regulation will have a direct impact on families. However, there may be positive indirect impacts in that the regulation will streamline and accelerate environmental negotiations. Such streamlining and acceleration will lessen the enforcement burden and its attendant costs to taxpayers.

The agency intends to hold a public hearing on the proposed regulation after publication.

Government decision-makers sometimes perceive litigation as a politically safer option than DR since the court can be blamed for any undesirable outcome. These decision-makers, however, have much more control over the outcome through DR than through litigation. Furthermore, they can still exercise their right to a court settlement if DR fails.

(5) DR is politically advantageous to the involved parties by enhancing their reputation for consensus-building and problem-solving. Because DR has developed only over the course of the past two decades, some local government officials and other small-group representatives are unaware of its existence or question its legitimacy as a problem-solving tool appropriate to the inherently conservative atmosphere of government. But DR is not the same as binding arbitration: its use is neither an admission of failure nor an abdication of authority, but a demonstration that the involved parties are sufficiently dedicated to the public good to be willing to compromise in order to reach a solution.

A large number of the issues settled through DR are environmental ones. Dispute resolution centers in New Jersey, Massachusetts, Minnesota, New York, New Mexico, Georgia, Florida, and many other states have initiated important discussions and facilitated agreements involving complex and controversial issues like the establishment of regional sewage treatment facilities, the siting of solid waste disposal facilities, the disposal of hazardous waste, the clean-up of a Superfund site, the spraying of herbicides, the adoption of environmental standards, and the siting of underground storage tanks. A well-known example of the successful use of mediation to address an environmental problem is the decade-long public battle over the development of Hawaii’s first state water code, which pitted developers against environmentalists, large landowners against small ones, and the counties against the state. This battle produced one legislative stalemate after another to the frustration of all parties but was finally resolved through mediation conducted by Hawaii’s Program on Alternative Dispute Resolution.

An example of what happens without DR is the case of the Hampton-Roads refinery in Virginia. The refinery was proposed in 1970, discussed for over a decade, but never built. Contributing to the failure of the project were badly timed changes in the permitting process, understaffing of the State Air Pollution Control Board, statutory vagueness, siting disagreements, lack of communication within the Army Corps of engineers, angry citizens, gubernatorial dissatisfaction with the progress of the project, the involvement of the federal government through both the Department of the Interior and the military, and the expiration of the initially issued permits. At the end of the failed project, the company’s expenses were over six million dollars, with about half of that in legal fees. The Army Corps of Engineers’ bill for legal fees was at least

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the State Water Control Board intends to consider amending regulations entitled: 9 VAC 25-110-10 et seq. General VPDES Permit for Domestic Sewage Discharges of Less Than or Equal to 1,000 Gallons Per Day. The purpose of the proposed action is to reissue the existing general permit which expires on August 1, 2001. The general permit will establish limitations and monitoring requirements for domestic sewage discharges less than or equal to 1,000 gallons per day. As with an individual VPDES permit, the effluent limits in the general permit will be set to protect the quality of the waters receiving the discharges. A technical advisory committee will be formed to assist in the development of the regulation. The primary function of the committee will be to develop recommendations to the board for the content of the reissued general permit through a process of negotiation and consensus. Persons who desire to be on the committee should notify the agency contact person in writing by 4:30 p.m. on Wednesday, March 15, 2000, and provide name, address, telephone number and the organization represented (if any). Notification of the composition of the technical advisory committee will be sent to all applicants. Following publication of the draft general permit regulation in the Virginia Register, the board will hold at least one public hearing to provide opportunity for public comment.

VA.R. Doc. No. R00-100; Filed January 27, 2000, 11:34 a.m.

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the State Water Control Board intends to consider amending regulations entitled: 9 VAC 25-260-5 et seq. Water Quality Standards. The purpose of the proposed action is to consider amending the water quality standards to update numerical or narrative criteria for dissolved oxygen for certain waters of the Chesapeake Bay and other naturally occurring low dissolved oxygen waters where current criteria are not appropriate.

Intent: The intent of this rulemaking is to protect designated and beneficial uses in the Commonwealth by adopting regulations that are technically correct and reasonable. These standards will be used in setting Virginia Pollutant Discharge Elimination System Permit limits and for evaluating the waters of the Commonwealth for inclusion in the federal Clean Water Act § 305(b) report and § 303(d) list. Waters not meeting standards will require development of a Total Maximum Daily Load under the federal Clean Water Act § 303(d).

Need: This rulemaking is needed because the current dissolved oxygen criteria (4mg/l minimum and 5mg/l daily average) are not appropriate in waters where the naturally occurring dissolved oxygen levels are below the existing criteria. These types of water may include the deep trenches of the Chesapeake Bay, the deep waters of stratified lakes and wetlands. Changes to these criteria are needed to

facilitate permitting, monitoring and Total Maximum Daily Load development.

Alternatives Available to Meet the Need: Many alternatives in the subject areas listed will become available as DEQ staff and the public begin to review scientific data and the needs of permitting and monitoring. DEQ will work in conjunction with other state and federal agencies to consider various alternatives. Alternatives provided by the public will also be considered.

The department has not accepted nor rejected any alternatives as of yet. Some alternatives being considered by the agency now include, but are not limited to, the following:

- whether we should include alternative dissolved oxygen criteria for the Chesapeake Bay, wetlands and lakes;
- whether we should consider for adoption the Chesapeake Bay Living Resources Goals or Environmental Protection Agency criteria or some other criteria;
- whether zones for application of the criteria should be included and what these zones should be (i.e. application of a lower dissolved oxygen criterion one meter off the bottom (for the Bay), in the hypolimnion or below the thermocline (lakes), throughout the column (wetlands) or should some other zone be considered for application of the alternative criteria);
- whether to improve the specific narrative criterion that recognizes natural background differences for all waters. Currently natural conditions in surface water are recognized in the following sections of the regulation: 9 VAC 25-260-10.G, 9 VAC 25-260-50 and 9 VAC 25-260-250;

Request for Comments: Comments are requested on the intended regulatory action, including any ideas to assist the agency in the development of the proposal. Comments are requested on the costs and benefits of the stated alternatives or other alternatives. DEQ also requests comments as to whether the agency should use the participatory approach to assist the agency in the development of the proposal. The participatory approach is defined as a method for the use of (i) standing advisory committees, (ii) ad hoc advisory groups or panels, (iii) consultation with groups or individuals registering interest in working with the agency, or (iv) any combination thereof.

Public Meeting: A public meeting was held on January 27, 2000, at 2 p.m. at the Virginia War Memorial, 621 South Belvidere Street, Richmond, Virginia 23220. The public comment period on the intended regulatory action has been extended until April 7, 2000. Please submit comments to Elleanore Daub, Office of Water Quality Programs, Department of Environmental Quality, 629 East Main Street, Richmond, VA 23219.

The agency intends to hold a public hearing on the proposed regulation after publication.

VA.R. Doc. No. R00-97; Filed January 20, 2000, 4:23 p.m.
On August 22, 1996, the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA) was enacted, introducing welfare reform at the federal level. In Title I of the Act, Congress replaced the Aid to Families with Dependent Children (AFDC) Program with the Temporary Assistance for Needy Families (TANF) block grant. This block grant considerably reduced federal regulation of cash assistance and employment services programs, allowing states to design their programs within limited parameters.

Because the framework of the AFDC program was repealed by Congress, Virginia adopted pre-TANF federal definitions of eligibility criteria in order to maintain the program as it currently operated in Virginia. To that end, the 1997 Virginia General Assembly adopted legislation that codified the old rules, and an advisory committee comprised of legislators, social services directors and workers, local government officials, and citizens was formed to consider new TANF options. The committee made recommendations to simplify and streamline the TANF and VIEW programs.

The proposed regulations, 22 VAC 40-295-10 et seq., will implement the recommendations of the TANF Advisory Committee and will also serve as a comprehensive program regulation. These regulations will be repealed and any necessary language included in the proposed comprehensive regulation.

The agency does not intend to hold a public hearing on the proposed repeal of these regulations after publication.

BOARD OF MEDICINE

Title of Regulation: 18 VAC 85-20-10 et seq. Regulations Governing the Practice of Medicine, Osteopathy, Podiatry, Chiropractic and Physician Acupuncture (amending 18 VAC 85-20-22 [ and 18 VAC 85-20-240 ]).

18 VAC 85-31-10 et seq. Regulations Governing the Practice of Physical Therapy (amending 18 VAC 85-31-160).

18 VAC 85-40-10 et seq. Regulations Governing the Practice of Respiratory Care Practitioners (amending 18 VAC 85-40-80).

18 VAC 85-80-10 et seq. Regulations Governing the Practice of Occupational Therapists (amending 18 VAC 85-80-120).

Effective Date: April 12, 2000.

Summary:

The amendments revise the schedule of fees paid by physicians and other medical professionals to the Board of Medicine. These fee changes bring the board into compliance with the board's interpretation of § 54.1-113 of the Code of Virginia, which requires all regulatory boards under the Department of Health Professions to revise their fee schedules if, after the close of any biennium, there is more than a 10% difference between revenues and expenditures.

Substantive changes made since the publication of the proposed amendments follow:

1. Because the proposed fee increases were not finalized by the projected January 2000 date, an additional fee increase of approximately $20/biennium from that originally proposed for doctors of medicine, osteopathy, podiatry and chiropractic was adopted. Also, an amendment was adopted to clarify that in reactivating an inactive license, the licensee must pay the difference between the current active and inactive fees.

2. The board added a fee for renewal of an inactive license. An inactive renewal fee is set at half the cost of an active renewal fee.

A summary of comments made by the public and the agency's response may be obtained from the promulgating agency or viewed at the office of the Registrar of Regulations.

BOARD OF LICENSED PROFESSIONAL COUNSELORS, MARRIAGE AND FAMILY THERAPISTS, AND SUBSTANCE ABUSE TREATMENT PROFESSIONALS

Title of Regulation: 18 VAC 115-20-10 et seq., Regulations Governing the Practice of Professional Counseling (amending 18 VAC 115-20-20, 18 VAC 115-20-40, 18 VAC 115-20-100, 18 VAC 115-20-110, and 18 VAC 115-20-150).

Effective Date: April 12, 2000.

Summary:

The amendments establish a new fee structure to comply with a statutory requirement that fees be sufficient to cover board expenditures. The fee structure has been determined in accordance with new Principles for Fee Development, which are being used to develop fee structures for all boards in the Department of Health Professions. Overall, this will result in an increase in fees for services provided by the board. For example, the renewal fee will increase from $75 per biennium to $105 per year. An initial licensure fee of $65 will be established for first-time licensees. A new flat fee of $165 for reinstatement of a license lapsed more than one year replaces the requirement to reapply under the current regulations. The amendments also include a fee of $500 for reinstatement of a license following disciplinary action which resulted in revocation or suspension of a license.

Changes to 18 VAC 115-20-40 that were published as proposed regulations on November 22, 1999, do not appear in the final regulation because they have been incorporated with another review that is being finalized in this issue of the Virginia Register. A minor amendment to subsection C of 18 VAC 115-20-100 sets forth a change of address notification requirement for licensees. This amendment was published as a proposed regulation on September 27, 1999, under another review.

Summary of Public Comments and Agency's Response: No public comment was received by the agency.

Agency Contact: Copies of the regulation may be obtained from Janet Delorme, Department of Health Professions, 6606 West Broad Street, 4th Floor, Richmond, VA 23230, telephone (804) 662-9575.

Final Regulations

Effective Date: April 12, 2000.

Summary:

The amendments establish an endorsement procedure for individuals with lengthy practice in other states. The amendments also update the education requirements based on national accreditation standards and provide for automatic recognition of graduate programs accredited by the two national accrediting bodies for counseling programs. To accommodate students currently enrolled in a degree program, the board has delayed the effective date for the new coursework requirements until April 12, 2002. To reduce the burden of the residency requirement on applicants, the board will now accept group supervision hours as equivalent to individual hours for up to half of the total supervised hours. In addition, two new licensure titles have been added for acceptable supervisors, graduate internship hours meeting certain criteria may be counted toward the residency, and the face-to-face supervision requirement is changed from one hour per week to one hour per 20 hours of work experience. The amendments specify that 2,000 client contact hours be accrued during the 4,000-hour residency in response to frequent requests from applicants for guidance on the expectations of the board. To reduce the financial burden on individuals who wish to renew a license that has lapsed for more than four years, a reapplication alternative to the current cumulative renewal and penalty fee requirement is established. The dual relationship prohibition in the Standards of Practice is amended to specify that sexual relationships with a client are strictly prohibited for five years following the cessation of services. The amendments also include general reformatting of the regulations, eliminating obsolete and unnecessary language, and including new language where needed to clarify requirements.

Changes to 18 VAC 115-20-20, 18 VAC 115-20-100, 18 VAC 115-20-110, 18 VAC 115-20-120, 18 VAC 115-20-130, 18 VAC 115-20-140, and 18 VAC 115-20-150 that were published as proposed regulations on September 27, 1999, do not appear in the final regulation because they have been incorporated with a fee change that is being published as a separate final regulation in this issue of the Virginia Register. Minor amendments to 18 VAC 115-20-40 are made to conform the language to the fee change that will become effective on the same day.

6. Not engage in offering services to a client who is receiving services from another mental health professional without attempting to inform such other professionals in order to avoid confusion and conflict for the consumer.

7. Provide counseling services for the purpose of diagnosis, treatment or personalized advice only in the context of a professional relationship, not by means of public lectures or demonstrations, newspapers or magazine articles, radio or television programs, mail or similar media.

8. Ensure that the welfare of the clients is in no way compromised in any experimentation or research involving those clients.

9. Disclose to clients all experimental methods of treatment and inform clients of the risks and benefits of any such treatment. Ensure that the welfare of the clients is in no way compromised in any experimentation or research involving those clients.

10. 8. Neither accept nor give commissions, rebates, or other forms of remuneration for referral of clients for professional services.

15. 13. Not engage in improper direct solicitation of clients and announce professional services fairly and accurately in a manner which will aid the public in forming their own informed judgments, opinions and choices and which avoids fraud and misrepresentation through sensationalism, exaggeration or superficiality.

16. 14. Provide clients with accurate information of what to expect in the way of tests, reports, billing, therapeutic regime and schedules before rendering services.

17. 15. Maintain client records securely, inform all employees of the requirements of confidentiality and provide for the destruction of records which are no longer useful. Client records shall be disclosed to others only with expressed written consent or as mandated by law. Client confidentiality in the usage of client records and clinical materials shall be ensured by obtaining informed consent from clients before (i) videotaping, (ii) audio recording, (iii) permitting third party observation, or (iv) using client records and clinical materials in teaching, writing or public presentations. Client records shall be kept for a minimum of five years from the date of termination of the counseling relationship.

In the case of supervisees or supervisors, this includes, but is not limited to, engaging in sexual intimacies with current supervisees. For at least five years after cessation or termination of professional services, licensees shall not engage in sexual intimacies with a therapy client or those included in collateral therapeutic services. Since sexual or romantic relationships are potentially exploitative, licensees shall bear the burden of demonstrating that there has been no exploitation. A patient's consent to, initiation of or participation in sexual behavior or involvement with a practitioner does not change the nature of the conduct nor lift the regulatory prohibition.

23. 17. Recognize conflicts of interest and inform all parties of the nature and directions of loyalties and responsibilities involved.

24. 18. Report to the board known or suspected violations of the laws and regulations governing the practice of professional counselors licensed or certified mental health service providers as defined in § 54.1-2400.1 of the Code of Virginia.

18 VAC 115-30-10 et seq. Regulations Governing the Certification of Substance Abuse Counselors (amending 18 VAC 115-30-30, 18 VAC 115-30-40, 18 VAC 115-30-110, 18 VAC 115-30-120, [ 18 VAC 115-30-130, ] and 18 VAC 115-30-160).

Effective Date: April 12, 2000.

Summary:

The amendments establish a new fee structure to comply with a statutory requirement that fees be sufficient to cover board expenditures. The fee structure has been determined in accordance with new Principles for Fee Development, which are being used to develop fee
structures for all boards in the Department of Health Professions. Overall, this will result in an increase in fees for services provided by the board. For example, the renewal fee will increase from $40 per biennium to $55 per year. An initial licensure fee of $40 will be established for first-time certificate holders. A new flat fee of $100 for reinstatement of a certificate lapsed more than one year replaces the requirement to reapply under the current regulations. The amendments also include a fee of $500 for reinstatement of a certificate following disciplinary action which resulted in revocation or suspension of a certificate.

All sections amended in this regulatory action were affected by a separate regulatory action published in 16:7 VA.R. 776-885 December 20, 1999. Those amendments became effective January 19, 2000. This final regulation has been changed to conform the following sections to those that became effective January 19, 2000. Also, 18 VAC 115-30-130, which was part of the proposed action, was repealed effective January 19, 2000, and therefore, has been removed from this final action. In addition, amendments concerning reinstatement instructions were made to conform this regulation with amendments made to the board’s other regulations.

**Statutory Authority:** §§ 54.1-113 and 54.1-2400 of the Code of Virginia.

**Effective Date:** April 12, 2000.

**Summary:**

The amendments establish a new fee structure to comply with a statutory requirement that fees be sufficient to cover board expenditures. The fee structure has been determined in accordance with new Principles for Fee Development, which are being used to develop fee structures for all boards in the Department of Health Professions. Overall, this will result in an increase in fees for services provided by the board. For example, the renewal fee will increase from $200 to $225 per biennium. An additional section is amended in the final action to reflect a new fee for reinstatement following revocation or suspension of a license.

**Summary of Public Comments and Agency’s Response:** No public comments were received by the promulgating agency.

**Agency Contact:** Copies of the regulation may be obtained from Janet Delorme, Department of Health Professions, 6606 West Broad Street, 4th Floor, Richmond, VA 23230, telephone (804) 662-9575.

DEPARTMENT OF MEDICAL ASSISTANCE SERVICES

Notice of Public Meeting and Public Comment - Middle Fork Holston River Watershed TMDL for Fecal Coliform Bacteria

The Department of Environmental Quality (DEQ) and the Department of Conservation and Recreation seek written and oral comments from interested persons on the draft of the Total Maximum Daily Load (TMDL) for fecal coliform bacteria on four segments in the Middle Fork Holston River watershed. These impaired segments are located in Washington County on Byers Creek, Cedar Creek, Hall Creek and Hutton Creek. These four segments are identified in Virginia's 1998 § 303(d) TMDL Priority List and Report as impaired due to violations of the state's water quality standard for fecal coliform bacteria.

Section 303(d) of the Clean Water Act and § 62.1-44.19:7 C of the Code of Virginia require DEQ to develop TMDLs for pollutants responsible for each impaired water contained in Virginia's § 303(d) TMDL Priority List and Report.

The third public meeting on the development of the fecal coliform bacteria TMDL for these four segments will be held on Thursday, March 30, 2000, at 7 p.m. at the Patrick Henry High School Auditorium, 31437 Hillman Highway in Glade Spring, Virginia. The draft TMDL study will be presented at this meeting.

The public comment period will end on April 11, 2000. A copy of the draft TMDL document for fecal coliform bacteria on the four impaired segments in the Middle Fork Holston River is available upon request. Questions or information requests should be addressed to Nancy Norton. Written comments should include the name, address, and telephone number of the person submitting the comments and should be sent to Nancy Norton, Department of Environmental Quality, 355 Deadmore Street, P.O. Box 1688, Abingdon, Virginia 24212, telephone (540) 676-4807, FAX (540) 676-4899, or e-mail nnorton@deq.state.va.us.
